

PATRICE LE VEXIER

plevexier@gmail.com

SENIOR .NET SOFTWARE DEVELOPER

Strong development aptitude, skills, commitment, and experience. 15 years of design, coding and testing with different languages with strong emphasis on:

- Object oriented development.
- Database development on SQL Server.
- Middleware, *n*-tier, and client-server.
- .NET/Java interoperability.
- ASP.NET MVC, JQuery, DotNetNuke portal and module development.

SUMMARY OF QUALIFICATIONS

Languages:	C#,VB.NET, Java, XML, HTML.
API:	.NET Framework 2.0 and 3.x, J2SE and J2EE.
Methodology:	OOP, UML, Design Patterns, XP.
Operating Systems:	Windows (XP,2000, NT, 9x), Linux.
Databases:	SQL Server 2005, Broker, Reporting. ADO.NET, JDBC.
Network:	TCP/IP.
IDE:	VS 2008, Idea, Eclipse.
Miscellaneous:	Building Automation, Expert MOM, Financial engineering, Neural networks.

WORK EXPERIENCE

Freelance Software Developer

Since January 2009

Since January 2009 I work as freelance developer. The main projects I worked on:

- WPF development in the financial industry.
- ASP.NET and ASP.NET MVC in the online gaming industry.
- QuickBooks development with the QBSDK + C#.
- DotNetNuke, module development.

CTech, Fort Lauderdale, FL.

January 2006 – December 2008

Lead Software architect and Enterprise application developer for a company providing Building automation services.

Lead Software/Architect

Designed, developed an enterprise solution for building management. This software is used in one of the largest university in USA.

- Manage a remote team of 5 developers, 2 based in India and 3 on site.
- Database architecture, stored procedure, extended procedure, Broker, Notification services, Reporting on SQL Server 2005.
- Middle tier design and development, strongly multithread application used to get point's values. The middle tier is able to pool 150 buildings and manage more than 30 000 points.
- Developed Obix driver (ver.1) in C#.

Environment: Windows 2003 Server 64bits, Visual Studio 2005 with .NET 2.0 and .NET 3.5, SQL Server 2005, building automation.

MT, Miami, FL.

June – Dec. 2005

Software Development Company providing interoperability solutions between .NET and Java.

Software Architect/Engineer

Designed, developed and maintained a C# client for JMS Server. This software is used in large scale system where interoperability between Java and .NET is necessary.

- Leading role in the development of AMQ4NET software, a JMS client for the .NET platform.
- Developed the core of the product, unit-testing code with NUnit.
- Documentation and support.

Environment: Windows 2k, .Net Framework 1.1, ActiveMQ 3.0, multi-threaded programming, network programming with both Java and C#.

GBS, Miami, FL.

Dec. 2003 – June 2005

Software Development Company providing IT consulting services.

Software Architect/Engineer

Designed, developed and maintained VB.Net and C# applications around accounting for a large financial client in the Miami area.

- Development of a financial suite tools based on QuickBooks 2004.
- Development of a solution for importing and exporting data from Proclose.
- Development of a .NET library for ACH, using C#.
- Unit-Testing with NUnit, support.
- Network administration on Linux RH9, firewall with IPTables, mail server with QMail, and DNS.

Environment: Windows 2k, .Net Framework 1.1, Linux, QuickBooks, Proclose, Crystal Report, ACH.

Hera Interactive, Paris, France.

Jan. 2002 – Aug. 2003

International financial company providing consulting on financial markets.

Software Engineer as Contractor.

Designed and developed EasyChart, a client server solution for stock technical analysis. This software is used in stock marketplace by traders to analyze, and make recommendations about stock market.
